

Dear FTC, I'm writing in support of petition CG Docket No. 04-208, Petition for Declaratory Ruling Regarding Truth-In-Billing and Billing Format. I'm frustrated by all the miscellaneous cell phone charges that show up on my bill each month. I believe the cell phone companies are making money by keeping consumers in the dark about which are reasonable or not. These charges make it difficult to compare plans. I've been using another service at home called Packet 8 which runs over my commcast line. My rate is \$20 a month. My bill is under \$22. It's straightforward and fair. The catch is I have to have high speed wireless and together it's about \$70/month. I'm a single mom who tries to economize. It's time for the FTC to stand with consumers and stop these deceptive practices. Sincerely, Janet Meiners Orem, UT 84057
